[1] A wall for photography: 6000 mm x h 2700mm
 It looks like a billboard so the stretchers of the back side of wall can be seen.
 But for the front side, the surface has plastic finish since the photograph
 will be attached on the wall. For the joints of the panels, fill with resin plaster then scrub.
 A timber column (used in Architecture exhibition) is still used on the backside.

写真のための仮設壁: 6000 mm x h 2700mm
 ビルボードのようにみせたいので、壁裏面の棧(筋交い)は見えてよい。
 正面は写真を貼付けるため、ポリ板の仕上げ。パネルのジョイント部分は
 樹脂系のパテで埋めて、磨く。建築展に使用した柱一本を裏面に使用。
